Using Examity with Canvas

Set up your exam in Canvas and make sure your exam has been made “available.” Next, send your course ID # to your dedicated account manager.

Your instructional designer will have to give you single sign-on access. Once you have access, select the name of your course in Canvas. Next, click on the Examity link. You must have the Examity link set to open in a new window.
Navigating Your Dashboard

Your Examity dashboard offers your access to four key areas, outlined below.

1. The **Courses/Exams** section provide you with access to edit exam shell items including: the start and end date of your exam, the proctoring security level, and specific exam instructions.
2. The **Students** section provides you with details on all students enrolled in your exams.
3. The **Exam Status** section allows you to track exam progress (e.g. scheduled and proctored exams). In addition, once an exam is completed, the Exam Status section houses all recordings of your proctored tests as well as time-stamped incident flags and comments.
4. The **Reports** section offers one-touch access to Examity’s robust reporting and analytics. Here, you can explore a variety of real-time reports such as your “Exam Summary Report” where you can review scheduled, canceled and unscheduled appointments.

- Green flags are raised when there is no incident.
- Yellow flags are issued when a rule is broken but cheating is not apparent.
- Red flags are given when the student exhibits clear cheating behavior.
- Blue alerts are reported when a technical issue arises.
